Re: X-Caliber Digital X-ray System

Dear Robbie,

I just wanted to tell you how pleased I am with the new digital x-ray system. I was one that put off getting the system for years. I had various reasons: waiting for the technology to mature, my old system was paid off, etc.

One day, I decided that I was tired of mixing processor chemicals, and doing quality control. And, I suspected that it would be a vast improvement.

After the first month with the new system, I am kicking myself for not doing it sooner! Taking x-rays is so easy that I nearly tripled the number of x-rays series that I performed over the previous month. (I'm also doing obliques again!) Patients love leaving with a copy of their x-rays on CD-Rom, and it has already stimulated referrals.

I spent two years researching x-ray companies from Oklahoma to North Carolina, and I can tell you that you and your staff are simply the best! I really appreciate your team and JPI installing my system in one day. I was ready to go on Monday!

Please extend my appreciation and thanks to your wonderful staff.

Sincerely,

A handwritten signature in blue ink that reads 'Dr. James W. Campbell'. The signature is written in a cursive style with a large, prominent 'J' and 'C'.

Dr. James W Campbell DC

P.S.: If your doctors are wondering whether the new system has helped grow my practice... consider this: August is on track to be my busiest month for patient visits in 21 years of practice!
