

DeteCT

Fast, High-Quality Imaging
With lower radiation exposure
than a conventional CT

STREAMLINED 3D IMAGING

Advanced 3D images without the infrastructure and space demands of conventional CTs.

FAST SCANS, SMOOTH WORKFLOW

Complete scans in just 19 seconds, helping your clinic stay efficient and your patients moving.

SMART IMAGING FOR LESS

High-quality scans with less space, energy, and maintenance. Keeping ownership costs lower than a conventional CT.

HIGHLIGHT FEATURES

ADVANCED IMAGING AND TECHNOLOGY

Delivers high-resolution, multi-modality scans for precise diagnostics.

USER-FRIENDLY INTERFACE AND OPERATION

Intuitive controls make exams simple and efficient for staff.

LARGE BORE & FOV

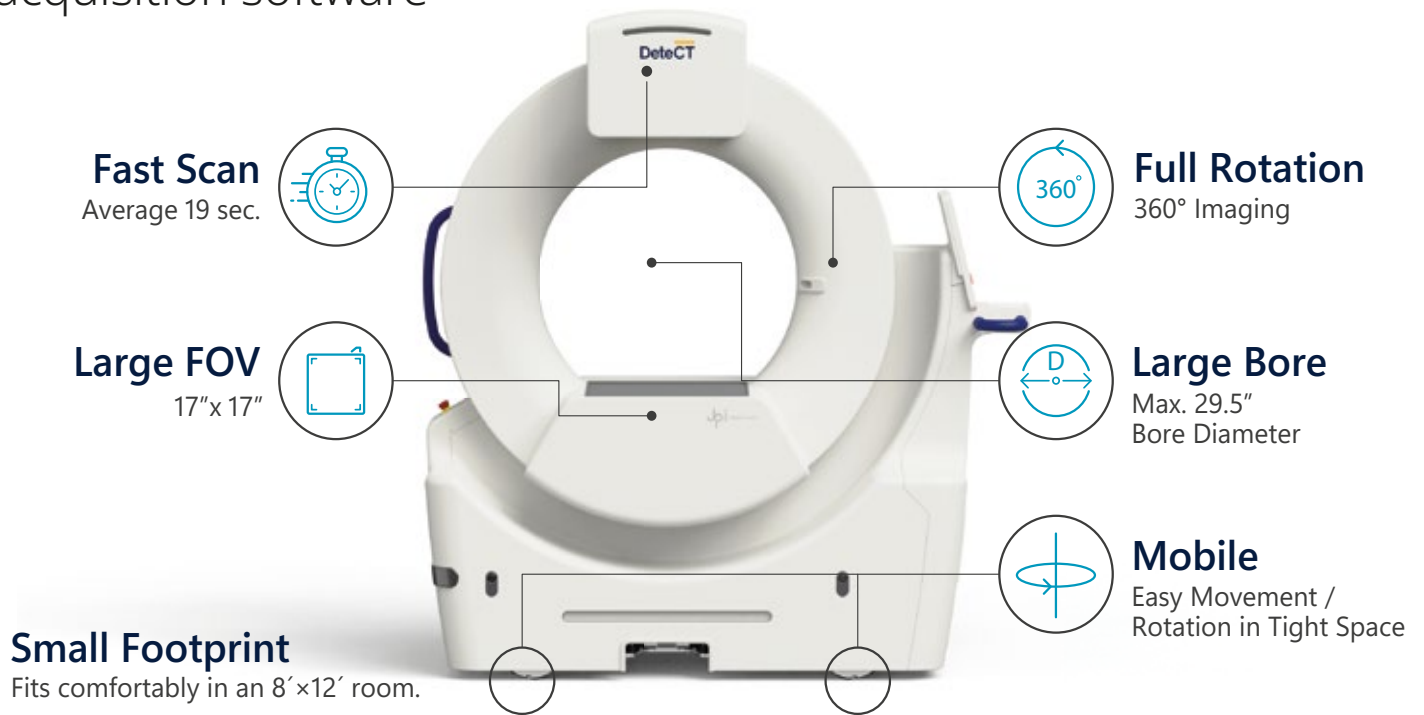

Accommodates patients comfortably.

DeteCT uses only about 1/4 of the radiation dose of traditional CT, (follows ALARA* principle)

*ALARA : 'As Low As Reasonably Achievable'

High-definition system that provides accurate **scans** with ExamVue™ Duo acquisition software

* Specifications are subject to change without notice

Simplifying Advanced Imaging

DeteCT system delivers the clarity you need, without the complexity of traditional CT.

Control Touch Panel

User-Friendly and intuitive UI for easy control and maneuverability

Customer Service

We are JPI. **After sales service and support** isn't just a priority—it's the core of our commitment. We are relentless in our pursuit of one singular goal: to **minimize your downtime**. Our outstanding support team of experienced and knowledgeable engineers are always ready to help.
